

freeVoice Vision 330 webcam for full HD video calls in the office or at home

The Vision 330 webcam has been designed for professional use in open-plan offices or for lively surroundings at home. Experience video conferences in razor-sharp HD picture quality with top-quality sound.

Flexible in every direction

The universal joint between the mounting bracket and camera lets you install and adjust the Vision 330 webcam wherever and however you want. The standard thread on the mounting bracket means you can fit it to a stand or tripod so that you can position it directly on a table. The protective liner on the inside of the mounting bracket prevents scratches on the screen and also improves the bracket's stability.

A crisp image with clear voices

The high-res (1080 pixel) image quality and fast autofocus makes the person you are talking to appear natural and almost real. Thanks to the integrated noise cancelling (NC) microphone, participants in the conference will hear your voice crystal clear without any ambient noises. The 80° field of view of the Vision 330 gives you enough freedom of movement, but is still calculated so that you don't have to worry about the background. The ideal camera for professional use in open-plan offices or for lively surroundings at home.

Simply perfect

Its compact design means you can easily take the Vision 330 webcam anywhere and hold a video conference wherever you want. Simply connect the webcam to a PC with a USB cable and away you go.
